Last Mile Access: Fibre

Utilising world class optical fibre infrastructure currently being rolled out around the country, ARC is able to offer last mile fibre access to provide businesses with a high-speed, high-capacity fixed line connection.

Fibre is a high-end access technology best suited for businesses that require a dedicated, guaranteed connectivity solution. It has the capacity for large volumes of data transfer and can allow access to a number of business applications including voice, data and managed network services

Typology Diagram

Features

- Bandwidth speeds ranging from 2-1000 Mbps available
- Available on 24-Month contract
- Symmetrical service with equal upload and download speeds
- Unshaped
- SLA guaranteed uptime of 99.5%

Benefits

- High capacity, high speed last mile access medium
- Can be bundled with dedicated internet services and voice solutions
- SLA based service, offering maximum reliability and uptime
- Scalable and easily upgradeable
- Suitable for real time applications requiring a high uptime
- No cable theft
