### Fixed Line - Dignet

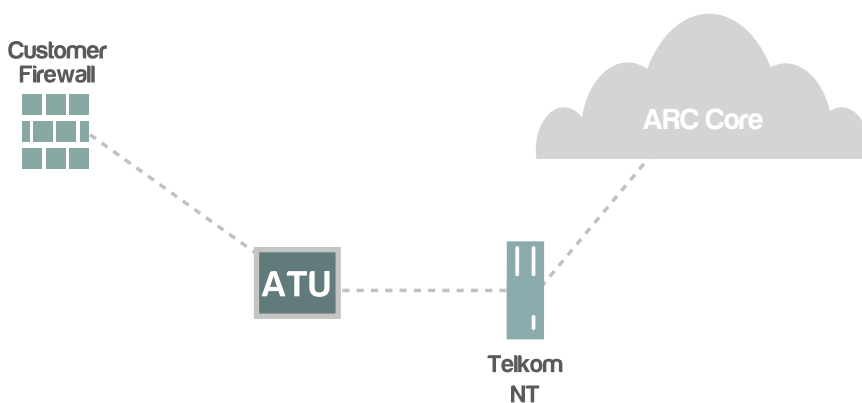

Fixed Line Dignet is a dedicated, copper-based data transfer service. It provides a 24/7, secure, dedicated point-to-point service over a digital network. Dignet also has a large point of presence with significant coverage throughout South Africa.

This product is ideal for businesses that require a highly reliable, always-on uncapped service that can provide a constant stream of bandwidth. Available at bandwidth rates of 128kbps up to 2048kbps, this service will provide a consistent link which optimises data streaming requirements such as video and voice data.

### Benefits

- Quality of Service (QoS) and reliability at a fixed monthly price
- High quality digital network providing consistent, high-speed connectivity for latency affected applications
- Flexibility and scalability of services as required
- Backed by 24/7 monitoring and Service Level Agreements (SLAs)
- Offers an uncapped service at a flat monthly rate
- Local and/or international bandwidth options available
